ZACK’S EVERGREENS
For Nursery Planting
Seedlings and Transplants.

WHOLESALE PRICE LIST
SPRING 1930

H. J. ZACK CO.
DEEP RIVER, CONNECTICUT
ZACK'S EVERGREENS
For Nursery Planting

Are well grown seedlings and transplants that will give you growing satisfaction.

- We specialize in the production of evergreens for lining out, understocks and forestry planting.

- Our Evergreen Seedlings and Transplants are clean grown, under careful cultural methods. We do not employ irrigation or over-fertilization to induce rank growth.

- Our Evergreens are therefore stocky, well matured, and are carefully dug and graded and promptly shipped.

You need Zack’s Evergreens to build up your growing Evergreen stock.

- We want your orders, and are prepared to give you service.

Harry J. Zack

HOW TO REACH OUR NURSERY

The Nurseries of the H. J. ZACK CO. are located in Deep River and Centerbrook, Conn.

Our Deep River Nursery is on the Hartford-Saybrook Road. Route 10, 30 miles south of Hartford, and six miles north of Saybrook.

Good concrete roads in all directions, and hourly bus service that stops at our Nursery.

The trade is cordially invited to inspect our growing stock at all times.

H. J. ZACK CO.
DEEP RIVER, CONN.
Wholesale Price List, Spring 1930

Prices quoted are per 100 and 1000. 10% discount on quantities of 5000 of one variety. 250 at 1000 and 2500 at 5000 rate.

A. Balsamea

From our northern forests, and commonly used for Xmas trees. Foliage dark green with silvery bands on lower side. Bark and foliage have a fragrant pungence. Balsam fir does best in cool moist soils.

A. Concolor

Rocky Mt. species, thriving at high altitudes. Compact narrow pyramidal form retaining its branches close to ground. The large flat leaves often two and half inches long, and silvery grayish blue in color renders this variety conspicuous in any landscape planting. Concolor Fir because of its hardiness, symmetrical growth, attractive foliage, and great adaptability to dry and exposed soils is the leading fir variety for American landscape plantings.

A. Douglasi (Pseudotsuga D.)

Douglas Fir

We offer the Rocky Mt. type from Colorado, which is hardy east of the Rocky Mts. Free growing and of narrow sharply pointed pyramidal form, with green to bluish green short flat needles. Douglas fir is a splendid ornamental, and can be readily used for window boxes, tub plants, hedges and specimen plantings.

BUXUS BOXWOOD

B. Sempervirens Arborescens

Tree Box.

The typical taller growing form with elliptic dark green leaves. This type is considered the hardiest of the Boxwoods and is best adapted for northern planting. We offer field grown, heavily rooted cuttings that have been wintered in the field, and are far superior to southern grown boxwoods.

CHAMAECYPARIS CYPRESS

C. Lawsoniana

Lawson’s Cypress

From the Pacific coast, northern California to British Columbia. Hardy into New York and Mass. One of the most beautiful of the cypress varieties, forming a narrow pyramidal tree densely branched to the ground. The foliage in flat sprays is bright green, and retains its color throughout the entire year.

**LARIX LARCH**
The larches are one of the few cone bearing trees hardy in the North, that are not evergreen. On account of their rapid growth they are all important timber trees for reforestation and will attain heights of 80 to 100 feet. Larches used in the landscape are attractive early in the spring. The new growth first appears in delicate shades of light green, and in the fall before the needles drop off, changing to a golden brown. The needles are arranged in clusters.

**L. Europea**
European Larch
An important timber tree from Central Europe, and adapted for reforestation.

ZACK'S EVERGREENS
For Nursery Planting.

**P. Sitchensis**

From Pacific coastal ranges, growing from Alaska to northern California. A highly ornamental spruce with silvery bluish green foliage. Prefers a moist, cool, sheltered location.

2 yr. Sdlg. 3-5" 3.00 20.00

**P. Excelsa**

From Central and Northern Europe, and early introduced to America. Broadly pyramidal, tall growing form. Foliage very dark green with a fragrant pungence. The Norway spruce is a very adaptable variety, and is useful for forest and ornamental planting. It thrives under varied soil conditions. On account of its rapid and dense growth it is one of the best evergreens for windbreak and screen plantings. Shears readily and forms attractive hedges. In the small stages it becomes useful for window box, tubs, and is the best variety for Christmas tree plantations. It has and will continue to prove one of the most popular and readily saleable spruces in the nursery trade.

We grow a stock of close to a million Norway spruces in various grades, and can make attractive quotations on large quantities of seedlings and transplants for lining out, grafting understocks, and forestry planting.

**P. Orientalis**

From Southeastern Europe and Asia Minor, and extremely hardy. A slow growing, compact and graceful spruce valuable for small lawns and gardens. Dark green foliage with tiny needles 1/4"-1/2" long, closely crowded against the stems. A distinct and interesting spruce variety.

2 yr. Sdlg 2" (limited supply) 4.00  ......  

**P. Polita**

From Japan and hardy to Southern Canada. Forms a dense growing broad pyramid with rigid branches. Foliage bright green with stiff sharply pointed needles spreading in all directions. Tiger tail spruce is an unusual and valuable spruce for landscape planting, and as a specimen tree will form an outstanding addition to any planting.

2 yr. Sdlg | 2-3" | 3.00 | 25.00  
| 4 yr. Trplts. | 4-6" | 6.50 | 50.00  

250 & 2500 @ 1000 & 5000 rate. 10% discount on quantities of a variety.
ZACK'S EVERGREENS
For Nursery Planting.

P. Pungens  Colorado Blue Spruce
From the Rocky Mts., and seems to thrive under all conditions. The compact growth with stout horizontal branches arranged in regular whorls, and color tones varying from greyish green to silvery blue, combine to make the Colorado Blue Spruce the most familiar and popular of the spruces. Its slow growth and close growing habits adapts it for planting on the smallest of lawns, and its natural ability to withstand dry soils and smoky air render this variety eminently suitable for city planting. The Colorado Blue Spruce is a leading variety in our nursery plantings. We grow our seedlings from seed collected in regions of the Colorado Rockies where the blue spruce types predominate.

3 yr. Trplts 2-3" 4.00 30.00
(We carry a stock of over 250M. in 5 yr. trp. grade)
4 yr. Trplt. 4-5" 6.00 50.00
4 yr. Trplt. 5-7" 7.50 65.00
4 yr. Twice Trpltd. 4-6" 10.00

PINUS PINES

P. Aristata  Bristle-cone Pine
From Rocky Mts., and hardy in New England. In cultivation forms a low shrubby tree with upright branches. Needles are in clusters of five, dark green and sprinkled with a resinous exudation characteristic of this variety.

2 yr. Sdlgs. 2-3" 4.00

P. Flexilis  Limber Pine
From Rocky Mt. ranges. A slow growing compactly formed pine of distinct appearance, and valuable for landscape planting, on dry stony and exposed sites. Foliage grayish blue, with stiff closely clustered needles three inches long, in clusters of five.

2 yr. Sdlgs. 3-5" 4.00 30.00

P. Peuce  Macedonian Stone Pine
Mountains of Balkan peninsula. Hardy into southern Ontario. A very ornamental species of narrow pyramidal form, with short densely clothed branches. Needles are straight, bluish green, 3-4" long, arranged in five in clusters. The Macedonian Stone Pine is very slow growing and is a most desirable species for the Foundation, rockery and small garden plantings.

2 yr. Sdlgs 3-4" 4.00 30.00

Pinus Peuce, Aristata and Flexilis are 5 needled pine and can ship into New England States only.

P. Densiflora  Japanese Red Pine
A rapidly growing Japanese variety that will attain great height and is therefore suitable for specimen and screen plantings. Foliage light green, 3-5" long. A handsome tree that will attain picturesque forms at maturity.

3 yr. Sdlg. 6-8" 3.00 20.00
4 yr. Trpts. 8-12" 6.00 50.00

P. Den. Tanyosho  Japanese Table Pine
A dwarf closely growing form of unusual appearance. From a short stout trunk less than 1 ft. high, spreading branches form a flatish table like bush that seldom grows more than 3 to 4 ft. in height. Foliage similar to Jap. red pine, of which it is a variation. These seedling grown Table pines may therefore show some reverting to the normal type.

2 yr. Sdlgs. 3-5" 4.00
2 yr. Trplts. 3-4" 5.00 40.00

Please note our terms of sale.
P. Mughus  
*Mugho Pine*

From mountain ranges of Central Europe, where it grows at very high elevations. It forms a low many stemmed dwarf tree from two to four feet in height and with a spread greater than the height. Foliage is two needled and very dark green. The very best of the naturally dwarf trees and of great adaptability for rockery, small garden and foundation planting. Will thrive as a ground cover on sloping banks, and is especially suitable for seashore plantings, as it withstands salt spray winds.

3 yr. Trplts  2-4" stocky  4.50  35.00

P. Montana  
*Mountain Pine*

A taller and more robust growing variety than the mugho pine, with often a single leading shoot. Attains a height of six to fifteen feet, and is suitable for planting as under cover, low screens, and landscape effects where a medium height pine is desired.

5 yr. trplts.  6-9"  6.50  55.00

P. Nigra (Austriaca)  
*Austrian Pine*

From Central Europe where it is important for timber and ornamental planting. A tall growing tree with stout wide spreading branches. Foliage very dark green, stiff and 3 to 6" long, with large conspicuous winter buds. Quick growing and of sturdy and rugged appearance, it seems to thrive under all conditions. City smoke, salt seashore spray, dry gravelly soils and windswept hillsides are successfully withstood by the ruggedly growing Austrian Pine, and for these reasons it is the most desirable of pines for windbreaks and city park plantings.

3 yr. Trplts.  4.7"  3.50  25.00

P. Poiretiana  
*Corsican Pine*

From Southern Europe. Forms a tall narrow headed tree. Foliage light green, 4-6" long with needles curving in various directions.

3 yr. Trplts.  3-6"  4.00  30.00

P. Ponderosa  
*Western Yellow Pine*

From Rocky Mts. where it is an important timber tree. Distinctive grayish green foliage from 5 to 10 long on established specimens. Will thrive on very dry soils and interesting as a specimen tree in landscape plantings.

2 yr. Sdlg.  3-5"  3.00  25.00

P. Resinosa  
*Red Pine*

An important and valuable timber tree in our northern states and the leading pine variety for reforestation. Foliage is deep green 2 needled, 4-6" long. Red Pine is especially immune to insect and fungous attacks. It forms a splendid ornamental and is adapted for mass and screen plantings.

2 yr. Sdlg.  2.50  15.00

P. Sylvestris  
*Scotch Pine*

From Northern Europe. Growth is very rapid and robust and will thrive equally well in clay and dry gravelly soils. Suitable for reforestation and mass and screen plantings where trees that will attain height quickly are desired.

3 yr. Sdgls.  5-8"  2.50  15.00

4 yr. Trpts.  6-9"  4.00  30.00

250 and 2500 at 1000 and 5000 rate.
ZACK'S EVERGREENS
For Nursery Planting

P. Thunbergii Jap, Black Pine
One of the handsomest tall growing pines from Japan. Foliage is a very dark glossy green, with stiff sharply pointed needles, and silvery white, pointed buds. Extremely hardy and well adapted for seashore and windbreak planting. A distinctive pine for specimen planting.
3 yr. Trplts 4-7" 5.00 40.00

THUJA ARBORVITAE
T. Occidentalis American Arborvitae
From our northern states, and dependable under all conditions. It commences to show its characteristic narrow tapering columnar form in even the small stages. The American Arborvitae stands close shearing and forms an attractive, densely growing hedge. A favorite for window boxes and tubs, and indispensable in every landscape arrangement where tall narrow pyramidal type trees are required. The Arborvitae attains saleable size quickly, and is always in ready demand. You cannot grow too many of this popular variety.
2 yr. Sdlg. 2-4" stocky 2.50 12.50
3 yr. Trplts. 3-4" 3.50 25.00

T. Oc. Ellwangeriana Tom Thumb Arb.
A dwarf growing variety with fine feathery foliage. Suitable for foundation and rockery planting. Would make unusual edging and hedges for formal gardens.
Trplts 5-7" 9.00 80.00
Two Yr. Trplts. 6-8" 15.00 120.00
Twice Trpltd. 7-9" 20.00

T. Oc. Rheingold Rheingold Arb.
A choice and unusual dwarf arborvitae similar in habits to Tom Thumb. Bright golden feathery foliage, retaining its color throughout the year. Rheingold Arborvitae requires planting in sheltered position north of Conn., but evidently hardy as there is a mature specimen 4 ft. tall in the Arnold Arboretum collection of thuyas.
Trplts 3-5" 15.00 120.00
2 yr. Trpts. 4-6" bushy 25.00

T. Oc. Spiralis Douglas Spiral A.
Dense pyramidal form with short sprays and small delicate, leaf scales.
Trplts 5-7" 15.00

T. Oc. Wareana Siberian Arb.
Forms a low broad pyramid, with heavy sea green foliage.
Trplts 5-7" 15.00

T. Orientalis Chinese Arb.
From Northern China and Manchuria. A graceful pyramidal tree with upright growing branchlets that appear to be arranged in close vertical layers. Foliage bright green, changing to purplish bronze shades in winter. Rapid growing and a popular variety for retail sales. The best grafting stock for the Biota varieties.
2 yr. Sdlg. 4-6" 2.50 15.00
3 yr. Trplts. 6-8" 4.00 30.00

T. Or. Compacta Compact Ch. Arb.
From compact type plants
2 yr. Sdlg. 4-6" 3.00 20.00
3 yr. Trplts. 4-6" 6.00

T. Or. Aurea Golden Ch. Arb.
From golden foliage plants
2 yr. Sdlg. 3-5" 3.00 20.00

Prices are per 100 and 1000. 10% discount on quantities of 5000 of a variety.
ZACK'S EVERGREENS
For Nursery Planting

1. Or. Tartarica
   Tartarian Arb.
   A new variety of narrow pyramidal form, showing a bluish green juniper like foliage.
   2 yr. Sd. 4-7" 3.50 25.00

   The compact and golden type varieties are grown from seed collected from trees showing variety characteristics, and al¬though they do not all come true to type, these seedlings will show a large proportion of interesting and valuable type forms in compact and globe shapes.

   TAXUS YEW
   T. Cuspidata
   Japanese Yew
   The most valuable and hardiest of the Yew species. A Japanese introduction and hardy into Canada. When grown from seed the type shows a broad upright growing pyramid, while cutting grown stock tends to form spreading bushy plants. Foliage very dark glossy green.
   1 yr. Sdgs 1" upright type 3.00 25.00
   Trplts. 4-6" (from cuttings) 10.00 .......... T. C. Nana (Brevifolia)
   Dwarf Jap. Y.
   A low spreading type densely clothed with very dark green, short closely clustered leaves. The best dwarf yew for foundation, and small garden plantings.
   Trplts 3-5" 18.00 150.00

   TSUGA HEMLOCK
   T. Sieboldi
   Siebold Hemlock
   From Japan, and hardy into Massachusetts. A slow growing pyramidal type of distinct appearance. Slender branches, with tiny dark green leaves.
   2 yr. Sdgs 1-1½" 4.00 30.00

   EUONYMUS BITTERSWEET
   The Evergreen Bittersweets are of Japanese origin. Self supporting vines and ground covers that stay evergreen throughout the entire year, and of dependable hardiness.
   E. Radicans with glossy green, elliptical leaves about 1" long, is slow growing, climbing to about 4 ft. and is splendid for planting against low retaining walls, and foundation covers.
   Trplts. 5-6" 5.00 .......... E. Rad. Variegata with bright silvery variegated foliage.
   Trpts. 4-5" 5.00 ..
   E. Carrieri, with leaves 2-3" long is much more robust growing, climbing to height of 15 ft.
   Trpts. 5-8" 6.50 .......... E. Colorata, a recent introduction and of great value as a ground cover. Bright green during summer and changing to scarlet during entire winter, which is retained until new foliage appears in spring.
   Trplts. 5-7" 6.50 .......... E. Minima, (Kewensis) with tiny round leaves, less than ¼" is a miniature type useful for planting between flag stones, rockeries and wall gardens.
   Trpts. 3-5" 5.00 .......... E. Vegeta with almost round, deep glossy green leaves is the most interesting of the type, and especially attractive in fall. The mature plants are heavily covered with scarlet berries which are wonderfully attractive with their background of glossy, green, leathery foliage. Will climb to height of 15 ft. against building walls or trellis, or forms self supporting bush.
   Rooted cuttings 3-5" 5.00 ..........
TERMS AND CONDITIONS OF SALE.

CREDITS—We extend the usual Nursery Trade Credits to firms of approved standing. Firms unknown to us, or those with whom we have had no previous business, are requested to state Trade and Financial reference in applying for credit, otherwise we will ship C. O. D. when no remittance accompanies order.

TERMS are 60 days net, and all spring statements due June 1st. Fall statements due Dec. 1. Interest will be charged on accounts after due date.

DISCOUNTS—2% and packing free on prepaid orders.

CONDITIONS—Orders are booked with the understanding that same shall be void in case of injury to stock from adverse weather conditions, errors in count, prior sales, prohibitory quarantine regulations and other causes beyond our control. We exercise the greatest care to keep our varieties true to name, and hold ourselves ready at all times to replace on proper proof all stock that may prove otherwise, or refund the amount paid, but shall not be held liable for any amount greater than the original purchase price.

CLAIMS for allowances must be made within five days of receipt of goods, and we will cheerfully make good any errors due to our fault. WE CANNOT CONSIDER DELAYED CLAIMS, NOR WILL WE MAKE REPLACEMENT FOR DAMAGES AFTER STOCK HAS BEEN RECEIVED AND PLANTED. SHIPMENTS are made by express and travel at the expense and risk of the consignee, and our responsibility in transit ceases after we get carrier's receipt for shipment. Claims for damages in transit must be made immediately to carriers agent at point of delivery.
